UTKARSH GUPTA

B.Tech in Information Technology

utkarshgupta0562@gmail.com | +91-8630593732 | linkedin.com/in/utkarsh-gupta-590483339 | github.com/UtkarshGupta-17

EDUCATION

GL Bajaj Institute of Technology and Management, Greater Noida *Oct 2023 – Aug 2027*

B.Tech in Information Technology – CGPA: 8.10

Jim Corbett Public School *2023*

Class XII (CBSE) – 85%

St. George's School *2021*

Class X (ICSE) – 85%

PROJECTS

Resume-JD Analyzer – Full-Stack GenAI Resume Screening Platform *2026*

Node.js, Express, MongoDB, React, GenAI (LLM), Prompt Engineering

- Built a full-stack web application that compares a candidate's resume against a job description and generates a fit analysis and transcript.
- Designed a Node.js/Express REST API backend with MongoDB for storing resumes, job descriptions, and generated analysis history.
- Integrated a GenAI/LLM pipeline to parse resumes and JDs, score alignment, highlight gaps, and auto-generate a tailored resume/transcript output.
- Implemented prompt engineering and output validation to ensure accurate, structured AI-generated results end-to-end from upload to report.

BizMind AI – Multimodal AI Business Assistant *2026*

Python, LangChain, Streamlit, GPT-4V, CLIP, FAISS

- Built a multimodal Retrieval-Augmented Generation (RAG) system for querying PDFs, images and spreadsheets using natural language.
- Implemented LangChain, CLIP and FAISS for semantic retrieval and document search.
- Developed an interactive Streamlit application integrating GPT-4V for multimodal document question answering.

AI-Based Anti-Spoofing & Fraud Detection System (Guidewire Hackathon) *2026*

Python, Machine Learning, APIs, Anomaly Detection

- Designed a fraud detection system using GPS, sensor, network and environmental data.
- Built Isolation Forest and Autoencoder models for anomaly detection.
- Developed ML-based behavioral analysis and dynamic risk scoring to identify fraudulent claims.

ACTIVITIES

Smart India Hackathon (SIH) Participant *Sept 2025*

- Selected among the top 55 teams at the college level.

Guidewire Hackathon – Finalist *2026*

- Reached the final round with the AI-Based Anti-Spoofing & Fraud Detection System project.

TECHNICAL SKILLS

Languages: Python, C++, C, JavaScript
Full-Stack / Web: Node.js, Express, React, REST APIs
AI/ML: Machine Learning, Deep Learning, CNN, GAN, LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering
Frameworks: LangChain, Streamlit, TensorFlow, OpenCV
Databases: MongoDB, MySQL, PostgreSQL
Vector Database: FAISS
Tools: Git, GitHub, Google Colab
Core Subjects: Data Structures & Algorithms, OOPs, Operating Systems, Computer Networks

CERTIFICATIONS

Cisco: Cybersecurity Essentials, Introduction to Cybersecurity, Exploring Networking with Cisco Packet Tracer, CCNA (Part 1), Python Essentials 1
MongoDB: Building GenAI Applications
